

13 November 1964

MEMORANDUM FOR : DAD/IO

SUBJECT : Advanced Intercept Instruments

REFERENCE : Your memorandum dated 12 November 1964;
Same Subject

1. Some selection is necessary if our capabilities are to be efficiently extended in order to intercept signal modulation techniques which USSR may employ in the future. While the Scientific Intelligence Reports referred to in your memorandum indicate the types of techniques that may appear an estimate of possibilities and timing is missing.

2. Would you please provide a chart indicating what may be expected where and when for guidance of our equipment development efforts. I would suggest a conference with [] to present to IO and S&D Chiefs and Branch Heads their estimate in this area. I have asked my people to read the references and consider what provision may already exist in our equipment as well as might be needed so that they can attend such a conference well prepared to evaluate the presentation in terms of development needs.
